Projects

Streamify — JavaScript, MongoDB, React, Express, Node.js

May 2025

- Developed a full-stack real-time language exchange platform featuring secure user authentication, friend requests, and live video/audio streaming via Stream API.
- Built stateless RESTful APIs secured with JSON Web Tokens (JWT), HTTP-only cookies, and route guards.
- Designed a responsive, modular UI utilizing Tailwind CSS and DaisyUI with instant notifications and user status dashboards.

Weather App — React.js, Vite, Node.js, Express.js, CesiumJS, OpenWeatherMap API

Jun 2025

- Engineered an interactive 3D globe visualization rendering global atmospheric patterns with CesiumJS and OpenWeatherMap API.
- Designed an Express reverse-proxy middleware to sanitize queries, cache responses, and secure third-party API keys.
- Implemented dynamic popup inspectors displaying contextual meteorological telemetry with full fallback and error boundary handling.
